-  Transparent border

**Sandblasted design**

To ensure that your design is properly sandblasted onto the massive glass panels we need you to deliver your design on both the left and the right panel templates. Make sure it is clear which parts must be sandblasted and which not. It is important that your design is a complete representation of the result.

*Design Rules:* Because of the high pressure of sandblasting the minimal possible line thickness is 2mm (8/100 inches), and the minimum spacing is also 2mm (8/100 inches). Text must be translated into, or represented as, vectors. Do not allow your design to infringe on the border around the panel (the area marked in green). Please ensure that the artwork is ready for printing or cutting. **Please send the artwork as Adobe Illustrator or PDF.**

**Full Color design**

If you'd like to take advantage of this option, please supply your file as a full color PDF in CMYK. The document should have a resolution of at least 200dpi at 100% of the final format. The print may be blurry at a lower resolution. All text is required in outlines/contours.

The measurements indicate the visible surface.  
For production please add an extra overlap of 3mm.

Kees van der Westen Espressonistic Works B.V. cannot be held responsible for disappointing results caused by less suitable files.

Please use WeTransfer when the file exceeds 5MB.
